Swanton, Ohio 43558

RE: Rule 2.26 Transfer Efficiency Conditional Approval of the DeVilbiss TEKNA Pro and TEKNA Pro Lite ('TEKNA spray guns')

Dear Mr. Hofert:

The Yolo-Solano Air Quality Management District (District) has performed a compliance review of your product with the requirements of District Rule 2.26 - Motor Vehicle and Mobile Equipment Coating Operations and has examined the conditional written approval from the Environmental Protection Agency (EPA) included with your correspondence.

Rule 2.26, Section 304.5 requires any alternate coating application method achieve a transfer efficiency equivalent to or higher than High-Volume, Low-Pressure (HVLV) spray equipment.

Based on our review of the submitted correspondence and documentation the District agrees that the TEKNA spray guns are capable of achieving a transfer efficiency equivalent to or greater than HVLV spray equipment.

The District grants conditional approval of the TEKNA spray guns for use on any motor vehicle or mobile equipment or their parts or components. This approval is subject to the same conditions outlined in the submitted EPA approval letter dated July 20, 2011 and are repeated below for information:

1. DeVilbiss Automotive Refinishing (DeVilbiss) shall supply written notification with each TEKNA spray gun sold or distributed for use within the jurisdiction of the District that the spray gun is only approved for the application of coatings subject to District Rule 2.26.
2. This approval is only valid with the use of a TE10 air cap with the air pressure supplied to the spray gun is equal to or less than 35 psig, or a TE20 air cap with the air pressure supplied to the spray gun equal to or less than 26 psig. DeVilbiss shall supply written notification with each TEKNA spray gun sold or distributed for use within the District that the maximum air pressure supplied to the spray gun shall not exceed the above values.

3. DeVilbiss shall supply an appropriate pressure gauge to allow precise measurement of the inlet air pressure, reflecting the maximum air pressure for the specific gun, with each TEKNA spray gun sold or distributed for use within the jurisdiction of the District. DeVilbiss shall supply written notification with each TEKNA spray gun sold or distributed within the District that the pressure gauge shall be attached to the spray gun and be in good working condition whenever the spray gun is in operation.
4. This approval is only valid if during actual operation the TEKNA spray gun is equipped with a properly operating pressure gauge that meets the criteria specified in condition number 2.

If you have any questions, please contact me at (530) 757-3650.

Sincerely,

Paul Andrew Hensleigh
Deputy Air Pollution Control Officer
