1. Install insert on screw until knurled groove end is flush.

2. Place Insert with screw into gun.

3. Lightly tap into gun until insert hits bottom of gun hole. The soft brass insert will not damage gun.

4. Remove screw.

5. Tighten adapter tightly to expand insert and seal fluid path.

**ADAPTER INSERT REMOVAL INSTRUCTIONS**

1. Place screw* thru box end wrench. Install screw partially into gun’s adapter insert.

2. Use second wrench to tighten screw against first wrench. This method will pull insert out of the gun.

3. Remove insert with screw. The gun will not be damaged.
