SNAP N FLOW™
by DeVilbiss

Simple System

Provides a more intuitive, familiar method of mixing and spraying paint

SNAP N FLOW™ significantly reduces the number of components (and steps) needed to complete a job.

A The unique chambered lid and venting tube design maximizes fluid flow to the spray gun. Lid sizing is optimized to 15 and 32 ounces - for small and large jobs. Lids with integrated filters are available in 125- or 200-micron sizes.

B The 15-and 32-ounce *SNAP N FLOW™* mixing cups are industry-standard sized and feature flat bottoms for easy stirring.

C The easy-connect adapter securely attaches the gravity spray gun to the *SNAP N FLOW™* lid. Adapters are available to fit a majority of gravity guns from major gun manufacturers.

D The sturdy flat lids are used when paints need to be mixed on the shaker. These flat lids are also used for longer-term paint storage.

E A shaker adapter is used with the flat lid for shaker mixing.

F Special *SNAP N FLOW™* plugs snap on the cone-shaped lids. The unique design allows the cup and vented lid system to be stored upside down — keeping the filter wet during paint storage.
